Sir,

SUB: Feedback on CNC Training

We appreciate the Training programme conducted by CNC Tech on "CNC Programming-Milling" for our employees in connection with our new CNC control system. Unlike other CNC training programmes, the training which imparted by you was amazing. The training methodology was quite different and fully focused on the concepts rather than conventional. The training programme will be immensely useful to generate error free CNC part program for any CNC control system.

We wish CNC Tech, the very best for all future endeavors.
