Re: CNC Training

Saturn Rings & Forging Ltd is an Export Oriented Unit situated at Shindewadi-Shirwal and we supply CNC turned rings to overseas customers. While we mastered the Forging & Ring Rolling Technologies and contained the rejections well below the industry standards, the rejections after CNC turned Rings are far away from the acceptable limits. Whenever we tried to analyse the rejections to find a root cause, we always noticed that the root cause of our inability to find root cause was lack of understanding about CNC turning fundamentals. Me as the COO of the Organization is also not able to participate and contribute to find root cause and fix the problems. At this juncture, we decided to hire a consultant which has also back fired and we realized that we need to bring in the fundamental knowledge of CNC turning Technology into our Organization. Then we googled and tried to locate a reputed CNC training provider at Pune and we are extremely blessed to get the name of CNC Tech in the first search suiting to our needs available in Pune. I have personally participated full time in the training of Five days.

We are extremely grateful to Mr Ravindra Pillay who has accepted to conduct the training at short notice and that too suiting my schedule to include a Sunday also during the Five days.

The feedback is that after nearly 4 years of our operations I have been very happy to have undergone the CNC Programming Training conducted by Mr Ravindra Pillay and enriched my CV

The result of the methodology of Training is that even a person of my responsibility and age can comfortably write a CNC turning program to achieve the first good product.

Re: CNC Training

I am one of the lucky ones that got the chance to attend the CNC training program conducted by you in our plant .The training was absolutely superb and I genuinely enjoyed each and every moment of it.The content was extremely informative and incredibly useful .I have attended several training before when I was in Tata steel as well as Mahindra, but I can't recall any of them having such a strong impact. You have done a wonderful job and I appreciate your efforts.

I will surely recommend this training to all my colleagues who is working in CNC area.

I, myself, would love to attend future training on the above said subject by you.

This training has more than met my expectations.

Sincerely,

R S CHOUDHARY
