H.R. Mahajani Marg, Matunga, Mumbai-19 (M.S.) INDIA

FEED BACK

I have undergone training at CNC Tech, Pune during 5th January 2009 to 10th January 2009. Though, I have learned CNC programming during my M. Tech in Production Engineering my knowledge about CNC programming was inadequate. One of my friend Mr S.K. Navhale who is working as an Asst. Works Manager in Ministry of defence suggested me the name of Mr Ravindra Pillai for the CNC training. It was a nice experience to undergo training at CNC Tech, Pune and the teaching methodology of Mr . Ravindra Pillai was very effective.

On the first day Mr. Ravindra Pillai gave me one mind twister game and asked me to create a pyramid out of two blocks. The game changed my outlook towards training and it has not remained mere a formality for me.

Mr. Ravindra Pillai has excellent experience and his teaching skills kept me always active during training. Course Content and additional reading material is excellent.

Teaching methodology is so fine that I could understand entire CNC PROGRAMMING easily. I feel most happy to have attended your course.

Prof. Dipak Vinayak Shirbhate

B.E. (Production Engineering)

M.E. (Production Technology and Management), AMIE

Lecturer, Department of Production Engineering

Veermata Jijabai Technological Institute, Matunga, Mumbai -19
